Trusted Wireless Switches

Clearance Pricing + Full Replacement Guarantee

For existing upgrades or new projects — Multi-way control, All On/Off & custom scenes

Package Features & How it Works

A modern lighting control system with built-in smart features. No additional servicing, WiFi, or Bluetooth required. Install within minutes.

KEY BENEFITS

Stability and Long Lasting

With 15+ years of experience, we ensure our products will last longer than you need them to.

Wireless Connection

Devices connect to each other directly, without requiring any existing wireless network such as WiFi.

Full Lighting Control

On/Off, dimming, or scene control — all at your fingertips. Set your own scenes for a simplified, personalised experience.

ALL On/Off

Press one button to turn everything on or off from any wall switch or remote.

Upgrade Control

Convert existing single-way switches into 3-way multi-location control without any rewiring or additional wiring work.

No Neutral Wire

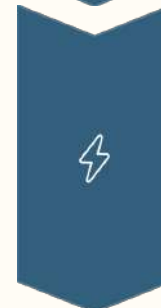

We offer a wall switch version that supports 1-to-1 replacement of existing wall switches — no neutral wire needed.

PLUG & PLAY INSTALLATION

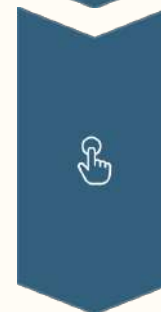

Receive Pre-Paired Kit

Your package arrives with all components factory-paired and ready for immediate use.

Quick "Plug"

Follow our simple instructions for a fast installation. Replace your existing wall switch directly, or locate your wiring and connect it to our 4-Gang Inline Switch.

Ready to "Play"

Use the provided default settings straight away, or customise your wall switch or remote into a scene controller of your choice.

Our Quality Guarantee

We stand behind every SwitchMap package with a straightforward, no-nonsense guarantee — because your confidence matters.

1-to-1 Replacement — No Questions Asked

If anything arrives faulty or isn't quite right, we'll replace it immediately. Simply contact us within **3 weeks of delivery** for a hassle-free exchange.

Standard 1-Year Warranty

Every package comes backed by a full 12-month warranty, giving you long-term peace of mind beyond the initial installation period.

Optional Addition

These devices can be added to any package for extra control and automation.

S1

Remote

Wireless handheld controller. Use as an extra switch or as a dedicated scene controller.

S2

Motion / Daylight Sensor

Battery-powered sensor. Automatically turns lights or scenes on when motion is detected and off when the area is empty. Also responds to daylight levels.

S3

Shade Controller

Wireless device that attaches to the shade motor. Enables any wall switch or remote to control curtains or blinds wirelessly. Supports up to 2 shades.

Track, motor & fabric not included — contact us for options.

S2

Gateway / App

Connects your system to our mobile app or third-party platforms for remote control and advanced automation.

Contact us for details.

Fan Coil Unit Package C

This wireless package reduces the need for wiring work by wirelessly connecting our fan coil control unit to the battery or USB powered thermostat. All temperatures are sensed at the thermostat to ensure comfort for the users.
